NEW HAVEN NURSERIES

SPRING
1930

J. Bagby & Sons Company
New Haven, Mo.

Just About Ourselves

Fifty-eight years have been spent in building up our nursery business at New Haven. It was established in 1872 by Julian Bagby. Our employees have grown up in the business and are honored citizens of the community. We state this fact that our customers may know that their orders are handled by responsible men. All of the trees we offer are grown on our own land and under our own care. We are proud of our record of the orchards that are growing in every state from the trees we have produced. Some of our customers have been with us for more than forty years, and we expect to keep right on serving a larger circle of new customers every year with Bagby quality trees. This list contains only the standard, time-tried and tested varieties.

Our years of experience in the nursery business have taught us that our customers like our way of doing business, for they know that we do not exaggerate the merits of our varieties. We produce good stock, true-to-name, pack it well, ship it promptly and in good condition, and charge only reasonable prices. Let us fill your order.

The Way We Do Business With You

Terms Cash, unless otherwise agreed upon. All orders to be sent C. O. D. must be accompanied with one-fourth the amount in cash. Remit by Money Order. Registered Letter or Check.

Order Early It is important that you order early. For the benefit of customers who wish to order early, but do not care to spare all of the money when the order is sent, we will accept early orders if 10 per cent of the amount is sent with order, and we will reserve the stock for you. Balance to be sent when you order the stock shipped.

Directions for Ordering Write name and address plainly. Always state distinctly the sizes and grades of stock ordered as per the grades given in this list. When varieties named cannot be furnished, we reserve the right to substitute such varieties as will fill the season as nearly as possible, unless prohibited in the order. Persons unacquainted with the different varieties will generally get a much better selection by leaving the assortment to us. Keep a correct copy of the order, so that when stock arrives you will know exactly whether you get what you have ordered. If we make mistakes, they are accidental, and we wish to right them.

Prices The prices are for the quantities named, but five, fifty and five hundred will be supplied at ten, hundred and thousand rates respectively—i. e., five at half the price of ten; fifty at half the price of one hundred, and so on.

The prices in this list are for the goods F. O. B. New Haven, Missouri. In our earnest endeavor to be fair with all our customers, we have discontinued the prepayment of freight.

Packing All goods are packed free. Notwithstanding this fact, we use the utmost care and pack all orders, large or small, according to the distance and our customers' best interests. Everything is correctly labeled.

Our Guaranty The fact that nurserymen, planters and fruit growers of the country have ordered of us year after year, is as good a guaranty as can be given by any other nursery of fifty-eight years' standing. If a mistake occurs we will cheerfully correct it. We use the greatest care possible to have our stock true-to-name, and should any prove not true, we stand ready to replace it free of charge, or to refund the purchase price, but it is mutually agreed between the purchaser and ourselves that we shall not at any time be held responsible for any sum greater than the amount originally paid for said stock. We guarantee stock to reach customers in good condition.

All shipments will be accompanied by Certificate of Inspection of the State Entomologist. Good stock, true-to-name, sold direct to the planter at reasonable prices is our aim.

We solicit correspondence and personal inspection of our stock, confident that it will compare favorably with the best.

Our Location NEW HAVEN is on the Missouri Pacific Railroad and also on the Missouri River, sixty-seven miles west of St. Louis. Our soil is the very best for producing well-ripened stock with splendid roots. Our facilities for prompt shipments are first class. Daily Truck Service to St. Louis.

Our Shipments Our shipments go to practically every State in the Union. We do not claim you should plant "Bagby-grown stock or none at all," but we do want to impress on you the fact that there is NONE BETTER.

APPLES

The first fruit, both in importance and general culture, is the Apple. Its period, unlike that of all other fruits, extends nearly or quite through the year. By planting judicious selections of summer, fall and winter sorts, a constant succession of this most desirable fruit will be obtained. Apple planting can never be overdone.

Our apples are all grown on Missouri river upland, on well-branched, whole roots, smooth, clean and well grown in every respect. No better trees can be found anywhere.

Summer Apples

BENONI—One of the best summer sorts. Red striped. Flesh yellow, tender, pleasant. Core small. Tree vigorous and upright.

CAROLINA RED JUNE (Red June)—Medium size; red, flesh white; last of June. Tree is very vigorous, upright, an early and abundant bearer.

DUCHESS OF OLDENBURG (Russian)—Medium to large size; skin yellow, streaked with red, somewhat blushed. Productive. August.

EARLY HARVEST—Medium to large, bright straw color; flesh white. Tree moderately vigorous and productive. First of July.

LIVELAND RASPBERRY—Fruit good sized, clear, waxen, white striped and marbled crimson; flesh snow-white, often tinged pink next to the skin, a very popular early summer variety. Blooms late, is blight-resistant, bears early, makes a good filler.

RED ASTRACHAN—Fruit large, roundish, juicy. Very hardy.

YELLOW TRANSPARENT—This valuable apple is said to be of Russian origin. We find it to be a valuable addition to our list. Medium to large; nearly white.

Carolina Red June

Fall Apples

Grimes' Golden

GRIMES' GOLDEN—Medium to large; rich golden-yellow; flesh tender, mild, sub-acid. Should be gathered before turning yellow and put in a cool place. Often keeps until February. Tree hardy, vigorous; an early and abundant bearer. October to January.

GOLDEN SWEET—Large pale yellow. Very sweet.

MAIDEN'S BLUSH—Rather large, evenly shaded red cheek or blush on a clear pale yellow ground; bears large crops. August and September.

WEALTHY—An apple of fine appearance and quality; an early and profuse bearer; a good market apple of its season. Tree hardy. Ripens here in August. Winter apple North.

WOLF RIVER—Very large; flesh whitish, sub-acid, good bearer. Very handsome and showy. November and December.

Delicious

Winter Apples

BLACK BEN DAVIS—Ben Davis type. Dark red color.

BEN DAVIS—Fruit medium to large; red striped; flesh white; an excellent variety. Tree very hardy; a free-grower, coming into bearing early and very productive. December to March.

DELICIOUS—A remarkably popular variety, and rapidly taking first rank both for commercial and home orchards in all the apple-growing sections of the country. Fruit large, nearly covered with dull dark red; fine-grained, crisp, juicy; quality best; a splendid keeper and shipper; vigorous grower.

GANO—This apple was introduced to the public in 1886. Tree very hardy; it bears very young. Fruit bright red on yellow ground, no stripes; large; oblong, tapering to the eye; surface smooth, takes a very high polish, making it valuable as a stand fruit; flesh white. Annual, early, prolific bearer.

GENETON (Rawles' Janet)—Medium, roundish, greenish-yellow, striped with red; rich and juicy; one of the best and longest keepers in the South and Southwest; valuable for its high quality and its late blooming; moderate grower. January to March.

HUNTSMAN'S FAVORITE—Originated in Johnson county, Missouri. Very large; golden-yellow, with bright red cheek; nearly sweet, fine flavor, very aromatic. One of the best and highest selling market apples; tree very healthy and productive. November to January.

Winter Apples—Continued

JONATHAN—One of our earliest and best bearers. Brings fancy prices. Extra long-life tree. Fruit a brilliant glossy red, with spicy rich acid flavor. Succeeds everywhere. A firm apple, crisp, tender and juicy. A great commercial apple and a splendid family sort.

KING DAVID—Handsome red apple. Some what deeper in color than Jonathan. Snappy flavor. Productive.

McINTOSH—One of the best early winter apples. Medium to large; roundish, slightly flattened at stem end. Deep crimson, striped with carmine.

MAMMOTH BLACK TWIG (Paragon)—Supposed to be a seedling of the Winesap, but tree a better grower and fruit much larger; or in other words, an improved Winesap. Tree a fine, upright spreading grower.

MINKLER—Bright red cheek. One of the very best late keepers. Seedling of Little Red Romanite.

NORTHERN SPY—A large red winter sort; rich, crisp and juicy. Tree strong grower and hardy. December to March.

ROME BEAUTY—Large, yellow shaded with red; tender, juicy, sub-acid. October to February.

STAYMAN WINESAP—Not quite so well colored as Winesap, but larger; splendid quality; a good keeper. Valuable for market or home use. A vigorous grower and adapts itself readily to different soils and conditions.

Jonathan

Winter Apples—Continued

Winesap

WINESAP—Medium, dark red; a favorite market variety. November to April.

WINTER BANANA—Fancy market fruit; large, pale yellow, pink bluish. Tree a strong grower.

YORK IMPERIAL—This apple has been gaining favor, and is being planted largely as a commercial sort. Large, smooth, yellow, shaded red, with indistinct red stripes.

Crab Apples

Prices for Crab Apples are the same as for other apples.

HYSLOP—Deep crimson. Very popular on account of its large size, beauty and hardiness. Keeps well into the winter.

TRANSCENDENT—Remarkably vigorous, growing to a good size, and immensely productive. Bears a little the second year from planting, and every year after, and produces good crops by the fourth year. The best of its class for cooking and eating; juicy and crisp. Skin yellow, striped with red. September to October.

WHITNEY—Large, averaging 1½ to 2 inches in diameter; skin smooth, glossy green, splashed with carmine; flesh firm, juicy and rich. Very hardy, vigorous, handsome.

YELLOW SIBERIAN—Fruit large, very juicy and excellent for preserves, jelly or pickles.

Pike Co., Mo., Nov. 15, 1929.

I received trees O. K. in good shape.

J. WARDLOW.

Clark Co., Ill., Nov. 5, 1929.

Received trees and am much pleased with them.

FRANK TOBIAS.

St. Louis, Mo., Nov. 18, 1929.

Received my trees and am well satisfied. Sure nice trees.

GEORGE CRAWFORD.

VISIT OUR NURSERIES during growing, digging and storage season. We welcome you at any time.

A Plate of New Haven Apples

Late Varieties

GOLD DUST—Large yellow clingstone; juicy, productive and of best quality. September 1st to 10th.

HEATH CLING (White Cling)—Large oblong, creamy-white, slightly tinged with red in the sun; very tender, juicy, melting; very rich and luscious. September 15th.

HENRIETTA (Levy) (Yellow Cling)—Magnificent yellow cling, large size, slightly covered with bright crimson; hardy, productive, always commands fancy prices. September 25th.

OCTOBER BEAUTY (Yellow Cling)—Late yellow cling. Originated on the grounds of Judge Hugo Muench of St. Louis. We recommend it as the best late yellow cling.

PICQUET'S LATE (Yellow Free)—A variety of large size, yellow, with red cheek; flesh yellow. September.

RINGGOLD CLING (White Cling)—Much larger than Heath, and in every way an improvement on that popular kind. A very valuable peach. September.

STUMP (White Free)—Late freestone of very fine quality. September.

Showing Different Sizes of Peach Trees.

N E W H A V E N N U R S E R I E S .

New Haven, Missouri, Feb. 20, 1930.

To Our Friends and Customers:--

We are enclosing herewith our Descriptive Catalog for Spring 1930. We sincerely hope you will read it carefully and find many things of interest.

BAGBY GROWN Nursery Stock has been 'Reliable for 58 Years' and every year we strive to give our customers the very best stock, at the most reasonable prices. If you have purchased stock of us, you know it is good, but if you have never bought or seen any of our stock, it will be a pleasure to give you the name of some one in your locality who has bought. Ask him about our stock, and we are sure he will tell you to order from the NEW HAVEN NURSERIES.

When you buy stock from ~~you~~ us, you get it direct from the grower, and pay only one small profit. When you buy from an agent, you are paying him for the time it takes to sell your stock, and also for the time he lost on prospects to whom he did not sell.

Trusting to be favored with your early order, which shall have our very best attention, for shipment at such time as you wish, we are,

Yours very truly,

NEW HAVEN NURSERIES.

ABUNDANCE—A hardy, productive Japanese sort. Large, purplish-red; quality very best. Season, early in July.

BLACK BEAUTY—The best Japan sort we have ever grown. Large, very dark purple, almost black. Persimmon shape. Quality and size of Abundance. Originated with us.

BURBANK—Large, varying less in size than the other Japanese plums; it is nearly globular; clear cherry-red with a thin lilac bloom; flesh deep yellow, firm and meaty; tree vigorous and productive. Last of July.

GERMAN PRUNE—Very profitable and will succeed wherever Common Damson can be grown. Very large. We consider it the best of European sorts. August and September.

GONZALES—Large red plum. Midseason.

HANSKA (Hansen Hybrid)—Good eating plum. Bright red.

RED JUNE—One of the largest Japanese varieties; ripens before Abundance. Tree upright, vigorous and hardy.

SHROPSHIRE DAMSON—A plum of fine quality, sprightly. In market it has commanded nearly double the price of the Common Damson; enormously productive. Last of September.

WANETA (Hansen Hybrid)—Dark purplish red. Delicious flavor. Trees small.

WILD GOOSE—Large, rich, crimson, beautiful; flesh soft, melting delicious, with a full fruity flavor. Tree a strong grower, prolific.

For the Home Orchard, plant Abundance, Burbank, Black Beauty and Shropshire Damson.

Burbank

Pears

Our pears are especially clean, smooth and well rooted, grown on XX French imported stocks.

Special Low Prices.

Summer Pears

BARTLETT—Large, skin very thin, clear lemon-yellow, with soft blush on the sunny side; flesh white, buttery, very juicy and highly flavored. The best summer pear in existence for quality.

KOONCE—The handsomest, best and most valuable; very early pear; tree vigorous, upright grower, free from blight; magnificent foliage, which it retains late in the season; fruit medium to large; skin yellow, does not rot at the core, juicy, sweet. Is an excellent shipper.

SECKEL (Little Sugar Pear)—Small, rich, yellowish brown with bright red cheek. Juicy, buttery and melting.

Lafayette Co., Mo., April 6, 1929.

The trees arrived in good shape and are extra good.

G. F. OBERHELMAN.

Kieffer

Autumn Pears

FLEMISH BEAUTY—Large, beautiful, juicy, melting, rich and fine; strong grower and good bearer; hardy everywhere. September and October.

GARBER — Originated in Pennsylvania. Fruit is large and beautiful; color bright yellow, with red; juicy and good; delicious canned.

KIEFFER—Tree a remarkable grower, with so vigorous a constitution that it rarely blights. Fruit of fine size, rich color and good quality. Brings high prices in competition with other varieties. Best when picked at maturity and house-ripened. October and November.

Wayne Co., Mo., Nov. 16, 1929.

About nineteen years ago I bought my first trees and you sure sent me good trees, and true to name and that is why I still buy from you.

D. R. BLACKNELL.

Wayne Co., Mo., Nov. 23, 1929.

The trees came in due time and I certainly do thank you very much for such a nice lot of trees.

D. R. BLACKNELL.

Boone Co., Mo., April 23, 1929.

The fruit trees I ordered arrived in good condition and are fine healthy trees. I had ordered trees from your nursery before and was pleased in every way.

MRS. J. R. ANTHONY.

Bartlett

Cherries

There are few more desirable fruits than Cherries, and they can be grown for market with great profit. Along the street or avenue as ornamentals; they are strong, vigorous growers, with large, glossy leaves and open, spreading heads, making a fine shade. Cherries thrive in almost any well-drained soil. The fruit is equally delicious whether eaten from the tree or preserved, and it will always find a ready market at profitable prices.

Our Cherry trees are all budded on Imported French Mahaleb stock. They have fine roots and nice heads. All well rooted and will be graded full size indicated, and up.

Each 10 100

Leading sorts, extra select,
2-year, 4½ to 6 feet.....\$1.00 \$3.50 \$70.00

Leading sorts, first-class,
2-year, 3½ to 5 feet..... .85 7.50 60.00

Leading sorts, first-class,
1-year, 3 to 4 feet..... .60 5.00 40.00

BLACK TARTARIAN—Sweet. Large size, meaty and good. Productive. Last of June.

ENGLISH MORELLO—Medium to large, blackish-red; acid; juicy. Very productive. Short lived. July.

EARLY RICHMOND (Kentish Virginian or Early May)—Medium size; red; melting, juicy, sprightly, acid flavor. This is one of the most valuable and popular of the acid cherries, and is exceedingly productive. First of June.

GOV. WOOD—One of the best sweet cherries, very large, white with pink cheek. Juicy, rich and delicious. Tree healthy and a great bearer. May and June.

MONTMORENCY—One of the finest acid cherries; tree very hardy and an immense bearer; commences to fruit while young and is loaded annually thereafter with fine crops; fruit of good size, fine flavor, and of bright, clear, shining red; valuable everywhere, especially for Northern latitudes; larger than Early Richmond, and fully ten days later. Season, end of June.

MAGANN—A sweet cherry. Fruit large, almost black when fully ripe, growing in large clusters. It will pay you to include some of these in your order for other stock.

For Middle West We Suggest as Best Commercial Sorts in Cherry—Richmond
Montmorency, Magann

Jackson Co., Mo., April 16, 1929.

Received trees and small fruit in fine shape. Am well pleased.

W. L. JACKSON.

Buchanan Co., Mo., Nov. 19, 1929.

I received my order in fine condition. I sure was pleased with the trees and shrubbery. They could not have been better.

G. A. McVEY.

Van Buren, Ia., April 25, 1929.

I wish to acknowledge receipt of fruit trees ordered of you. I believe they are as good trees as could be produced anywhere regardless of price. Many thanks for the gratis trees. You surely give full value.

CLYDE KERR.

Shade and Ornamental Trees

CATALPA BUNGEI (Umbrella Catalpa)—Grafted on straight stems, it makes an umbrella-shaped top without pruning. Perfectly hardy, and flourishes in all soils and climates.

	Each	10
5 to 7 feet.....	\$1.00	\$8.00
4 to 5 feet.....	.80	7.00
3 to 4 feet.....	.70	5.00

CATALPA (Speciosa)—Hardy Catalpa. Has very large, broad leaves and fragrant purplish white blossoms. Excellent for post timber as it is very resistant to rot.

	Each	10
6 to 8 feet.....	\$0.50	\$4.00

ELM (American)—A native tree of large size. Wide spreading head and graceful drooping branches. A hardy grower. One of the best park and street trees.

	Each	10
6 to 8 feet.....	\$0.80	\$6.50
8 to 10 feet.....	1.00	8.00

MAPLE (Soft)—A native tree of very rapid growth. Hardy everywhere and easily transplanted. Leaves are finely cut, bright green on upper and whitish on lower side.

	Each	10
8 to 12 feet.....	\$1.00	\$8.00
6 to 8 feet.....	.75	6.00

Soft Maple

Lombardy Poplar

POPLAR (Lombardy)—A tall, rapid grower. Always makes a striking feature in any landscape. For tall screens and backgrounds, this tree is admirable.

	Each	10
6 to 8 feet.....	\$0.60	\$5.00

PUSSY WILLOW—Very popular for ornamental purposes because of the attractive catkins formed on the branches early in the Spring.

	Each	10
3 to 4 feet.....	\$0.60	\$5.00

RUSSIAN MULBERRY.

	Each	10
4 to 6 feet.....	\$0.60	\$5.00

SYCAMORE—One of the tallest of our native trees. Very shapely and much admired because of its white spotted bark. One of the best trees for cities.

	Each	10
5 to 6 feet.....	\$1.00	\$8.00

TULIP TREE—A tall, robust tree of magnificent appearance. Leaves of unusual form. The blossoms are tulip-like in shape.

	Each	10
5 to 6 feet.....	\$0.80	\$7.00

Ornamental Shrubs

It's Not a Home Until It's Planted

ALTHEA (Hibiscus, or Rose of Sharon)—
Handsome, late, summer-flowering shrub.
Assorted colors. Each 10
2 to 3 feet.....\$0.40 \$3.50

BARBERRY (Thunbergii)—A very valuable
low growing shrub; perfectly hardy. Small
green leaves changing to red in fall. Twigs
thorny and covered with red berries in
the Fall and Winter. Each 10
18 to 24 in.....\$0.35 \$3.00

BARBERRY (red leaf)—Similar to the
green leaved Barberry but the foliage is
of a rich, lustrous, bronzy-red, which be-
comes even more brilliant as the season
advances. Each 10
18 to 24 inches.....\$0.75 \$6.00

BUTTERFLY BUSH—Very fast growing
shrub; is valued for its dark purple flow-
ers, borne in long spikes on tip end of
each branch, in late July and August. Each 10
2 to 3 feet.....\$0.40 \$3.50

COTONEASTER—A handsome fruiting
shrub, with brilliant foliage. Grows well
in any well drained soil, but needs plenty
of sunlight. 18 to 24 inches, balled and burlapped,
each\$1.50

DEUTZIA (Crenata)—Foliage light green;
flowers double white, outside tinged with
rose. Each 10
2 to 3 feet.....\$0.40 \$3.50

DEUTZIA (Pride of Rochester)—Flowers
pure white, double, tinged with pink. Pro-
fuse bloomer. Tall shrub. Each 10
2 to 3 feet.....\$0.40 \$3.50

FORSYTHIA (Golden Bell)—A spreading
bush with dark, shining foilage. Deep
yellow flowers appear before the leaves. Each 10
3 to 4 feet.....\$0.50 \$4.50

HYDRANGEA (Arborescens Grandiflora)
(Hills of Snow)—Blossoms large, snow
white. Blooms from June to September. Each 10
2 to 3 feet.....\$0.45 \$4.00

HYDRANGEA (Paniculata Grandiflora)—
Blooms early in August and continues un-
til freezing weather. White, turning to
pink. Each 10
2 to 3 feet.....\$0.50 \$4.50

LILAC (White)—When planted with purple
makes a very desirable contrast. Each 10
2 to 3 feet.....\$0.60 \$5.00

LILAC (Purple)—A good grower. Flowers
and young wood fragrant. Each 10
2 to 3 feet.....\$0.60 \$5.00

MOCK ORANGE (Philadelphus)—Flowers
white. Deliciously perfumed. Flowers re-
semble orange blossoms. Each 10
2 to 3 feet.....\$0.40 \$3.50

Ornamental Shrubs—Continued

PRIVET (California)—A vigorous-growing variety of fine habit; thick; glossy. The finest of ornamental hedge plants.

	10	100
3-yr. No. 1—3 to 4 ft., extra heavy	\$1.25	\$10.00
2-yr. No. 1—2 to 3 ft., heavy	.80	7.00
2-yr.—18 to 24 inches, first class	.60	5.00

PRIVET (Ibodium)—A new variety. Similar to California Privet in growth and appearance. Perfectly hardy.

	10	100
2-yr.—2 to 3 feet	\$0.80	\$7.00
2-yr.—18 to 24 inches	.60	5.00

SNOWBERRY (White)—An old-time shrub. Delicate pink flowers which produce clusters of pure white berries, which remain practically all winter.

	Each	10
2 to 3 feet	\$0.40	\$3.00

SNOWBERRY (Red) (Indian Currant) (Coral Berry)—Berries red, somewhat smaller than White Snowberry.

	Each	10
2 to 3 feet	\$0.30	\$2.50

SPIREA (Anthony Waterer)—Flowers bright red in flat clusters. Blooms nearly all summer. Dwarf variety, growing 2 to 3 ft.

	Each	10
18 to 24 inches	\$0.50	\$4.50

SPIREA (Billiardi)—Bears pink flowers in spikes in July and August. Upright grower.

	Each	10
2 to 3 feet	\$0.40	\$3.50

SPIREA (Douglasi)—Upright in growth, with reddish-brown branches and narrow oblong leaves. Bears spikes of beautiful rose colored flowers.

	Each	10
2 to 3 feet	\$0.40	\$3.50

Snowball

Catalpa Bungei (See Page 14)

SPIREA (Prunifolia) (Bridal Wreath)—Very graceful shrub. Is covered with small white flowers in April. Foliage bright green turning to orange red in fall.

	Each	10
2 to 3 feet	\$0.45	\$4.00

SPIREA (Van Houtti)—An extremely graceful shrub with long, drooping branches completely covered with clusters of white flowers in May and June. Makes a beautiful hedge. Perfectly hardy.

	Each	10	100
2 to 3 feet	\$0.30	\$2.50	\$20.00

SNOWBALL (Common)—Flowers white, in clusters; very attractive. May to June.

	Each	10
2 to 3 feet	\$0.60	\$5.00

TAMARIX (Africana)—Beautiful feathery foliage, light pink flowers. A tall graceful shrub growing 8 to 12 feet.

	Each	10
2 to 3 feet	\$0.40	\$3.00

WEIGELIA (Floribunda)—Flowers are very numerous and are a beautiful crimson when fully opened. A tall growing shrub.

	Each	10
2 to 3 feet	\$0.50	\$4.00

WEIGELA (Rosea)—An elegant shrub, with fine rose-colored flowers. Erect, compact growth. Blooms in June

	Each	10
2 to 3 feet	\$0.50	\$4.00

WEIGELIA (Eva Rathke)—A large upright shrub with crimson trumpet shaped flowers.

	Each	10
2 to 3 feet	\$0.50	\$4.00

Evergreens

BALLED AND BURLAPPED

American Arbor Vitae

AMERICAN ARBOR VITAE—One of the most popular evergreens. Very easy to transplant, and is very attractive as a hedge plant. Stands trimming better than any other evergreen.

2 to 3 feet.....\$3.00 Each

CHINESE PYRAMIDAL ARBOR VITAE—A densely columnar type, admirable for ornamental purposes. Very hardy.

2 to 3 feet.....\$3.50 Each

DOUGLAS FIR—Popular for its hardiness and great beauty; large conical form; branches spreading horizontally.

2 to 3 feet.....\$4.25 Each

PFITZER JUNIPER—One of the handsomest of the semi-dwarf Junipers. Its habit of growth, its pendulous branches and attractive foliage are strikingly beautiful.

18 to 24 inches.....\$5.00 Each

MUGHO PINE—Very dwarf in habit, having a ball like form that is greatly admired. Excellent in foundation groups or as individual specimens.

12 to 15 inches.....\$4.00 Each

COLORADO BLUE SPRUCE—One of the most valuable evergreens grown. Becomes a tree of upright conical form. Foliage is a bluish green.

18 to 24 inches.....\$7.00 Each

NORWAY SPRUCE—Becomes a tall tree of majestic conical shape. One of the most rapid growing and shapely of the tall dark green spruces.

2 to 3 feet.....\$3.00 Each

WHITE SPRUCE—A very hardy evergreen. Compact upright grower, retaining its branches to the ground. Elegant silvery foliage. Long lived.

2 to 3 feet.....\$4.25 Each

Cooper Co., Mo., Nov. 18, 1929.

Trees received promptly and am well pleased. CHAS. E. LAMM.

Lafayette Co., Mo., Nov. 16, 1929.

Trees arrived yesterday and are fine. MRS. J. P. LOHOEFENER.

Colorado Blue Spruce

Climbing Vines

BOSTON IVY—A very hardy vine with foliage turning brilliant red in autumn. Clings very tightly to any wall.

Each 10
2-yr. No. 1.....\$0.50 \$4.00

CLEMATIS PANICULATA—Fast grower. White flowers are borne in clusters completely covering the foliage. September.
Each.....\$0.40 10.....\$3.50

Dahlias

For best results plant Dahlias late in June or early in July. Cultivate thoroughly.

Spraying

Spraying is a vital necessity if you want GOOD Fruit. It doesn't pay to miss one season, even if enemies are not visible. Spraying has an invigorating effect on trees, besides controlling enemies.

Spraying during the dormant period is distinctly different from spraying on foliage. Materials several times as strong can be used and are needed to control the scales.

On account of the life habits of enemies, often only two to seven days are available for any one spraying. Do the work then. Put the material on with force and cover every inch of bark and leaf.

Get a sprayer that is big enough, that will give one hundred to two hundred and fifty pounds of air pressure, that is adapted to your land and trees, and that is durable. Get a power outfit, if possible, for it does better work than a hand pump can.

The Spraying program ordinarily resolves itself into two, three or four applications, one while trees are dormant with SCALECIDE, and the others on blossoms and fruit with SULFOCIDE. All applications must be guided by careful study.

Spraying will pay bigger dividends than anything you can do. Anything that is worth having is certainly worth taking care of.

BORERS WILL ATTACK FRUIT TREES IN SPITE OF ALL WE CAN DO, and will kill many trees if left alone. Trees must be gone over several times each year, and should be gone over each April and August.

Spray Materials

SCALECIDE
—THE COMPLETE DORMANT SPRAY—

Costs More Per Gallon - but Costs No More Per Tree

Scalecide is truly the complete dormant spray. Applied in the fall it controls scale of all kinds, bud-moth, pear psylla, peach leaf-curl, and fungous cankers. The delayed dormant spray with Scalecide controls scale, aphids, pear thrips, leaf miner, case bearer, leaf roller European red mite, bud-moth, and fungous cankers. And in addition year after year use of Scalecide invigorates the trees. Scalecide is guaranteed to make a better orchard than lime-sulfur.

Scalecide is pleasant to use; it does not injure even the eyes. It is non-poisonous. It saves half the labor of spraying—a tankful of dilute Scalecide goes as far as two tankfuls of dilute lime-sulfur. Scalecide saves the cost of nicotine; saves the cost of spreader; saves more than three-fourths the freight and haulage. A fifteen-gallon drum of Scalecide covers the same trees as a fifty-gallon barrel of lime-sulfur.

PROPORTIONS

For small quantities of spray solution, these figures will help you to get the proper mixture. Be accurate.

MATERIAL

Scalecide—Dilution recommended, 1 gallon to 15 gallons of water. 3 cupsful (1½ pints), equivalent for 3 gallons of water.

Sulfocide—Dilution recommended, 1 gallon to 200 gallons of water.
4 tablespoonsful (2 ounces), equivalent for 3 gallons of water.

PRICES

Scalecide		Sulfocide	
50-gal. bbls.....	\$35.00	50-gal. bbls.....	\$60.00
30-gal. bbls.....	25.00	30-gal. can.....	39.00

SULFOCIDE
A Better Summer Spray

Sulfocide is a highly concentrated non-poisonous liquid sulfur fungicide—entirely distinct from lime-sulfur. Within a few minutes after the spray is applied and before it is dry, Sulfocide is decomposed by the action of the air leaving a film of extremely fine sulfur in its most active fungicidal form.

Briefly these are the reasons why Sulfocide is a better summer spray: it does not russet apples (bordeaux does); it does not devitalize foliage and dwarf the fruit (lime-sulfur does); it can be used on both peaches and apples and on all kinds of fruits and vegetables (no other fungicide can). It imparts to fruit a beautiful luster and finish. It costs no more than home-made bordeaux.

AMOUNTS OF DILUTE SPRAY REQUIRED

These figures will be fairly accurate for both Scalecide as a dormant spray and Sulfocide as a summer spray.

2 to 5-year-old trees.....	1/8 to 1/4 gal.
6 to 8-year-old trees.....	3/4 to 1 gal.
9 to 13-year-old trees.....	1 to 1 1/4 gal.
14 to 18-year-old trees.....	2 to 2 1/2 gal.
19 to 24-year-old trees.....	3 to 3 1/2 gal.
25 to 30-year-old trees.....	3 1/2 to 4 gal.

Spray Pumps

We are agents for the well-known Myers Pumps.

If sizes quoted do not meet your requirements, send for full information and quotations on larger sizes.

No. 1296 2 1/2 Gal. Galvanized Tank	\$ 5.50
No. 1296B 2 1/2 Gal. Brass Tank	8.75
No. 1297 4 1/2 Gal. Galvanized Tank	6.75
No. 1297B 4 1/2 Gal. Brass Tank	10.50
3/8-inch Three-Ply Hose	15c per foot

The above are Compressed Air Sprayers with Shoulder Straps.

Cog Gear Barrel Pumps

(Barrel not included)

No. R305B—Spray Pump with one lead of 15-ft. 1/2-inch, 5-ply discharge hose; graduating Vermorel Nozzle, and both jet and mechanical agitators.	
Each	\$15.00
5-ply hose	20c per foot

Planting and Pruning

Care of Stock

The bundles should be opened, the roots dipped in water, then "heeled-in" in moist ground so that the mellow earth will come in contact with the roots and thoroughly protect them from the air, having the earth tramped solid about them. When ready to plant, take up only a few at a time, puddle the roots and do not allow them to lie exposed to the sun or air. The ground should be carefully prepared by deep plowing and firming down with a disc and harrow.

Planting

The holes for planting must be large enough to receive the roots freely, without cramping or bending them from their natural position. All broken or mutilated portions of the roots must be cut off so as to leave the ends smooth and sound. All trees should be planted about as they stood in the nursery row; **pack the soil very firmly about the roots**, being careful not to bark or break the roots. Leave three inches of the surface soil loose to serve as a mulch. If the ground is very dry apply one or two pails of water before this soil mulch is in place, and after the water has soaked away it can then be placed over the moist soil.

Pruning When Planted

All fruit trees require more or less pruning when planted, and thereafter from year to year. On Apple, Pear and Cherry remove unnecessary branches and cut back growth of remaining branches to insure good growth the first season. On Plum and Peach remove branches to within one inch of body of tree, and cut back the top leader to the desired height for a new head. The usual rule with Peach and Plum is to prune to rough stick form to about three feet in height. The above instructions on pruning are for freshly planted trees only.

Mulching

Unless thorough surface cultivation will be practiced during the summer a mulch should be applied. This may be a layer of coarse manure or vegetable matter around the trees three to six inches deep, and extending out from the trees three to five feet. Mulching protects the soil against the sun and drying winds; against alternate freezing and thawing, and provides some plant food.

Shrubs

If planted in beds or groups the ground should be spaded deeply and well worked. If shrubs are set as individual specimens they should be planted the same as trees.

Hedges

Privet—Dig trench about twelve inches deep and set the plants two to three inches deeper than they stood in the nursery row, or deep enough so the lower branches will be partly under the ground. Such planting will make a compact hedge down to the ground line, but if the plants are set too shallow there will always be undesirable open spaces at the base of the hedge. Privet and Spirea can be set about nine inches apart in the row. Cut back to about six inches of the ground after planting.

Treatment of Nursery Stock

That Has Been Frozen in the Packages or Received During Freezing Weather.

Place the package UNOPENED in a cellar or some such place that is COOL but free from frost, until completely thawed. DON'T be in a hurry to open. The stock can remain in the packages for TWO WEEKS OR LONGER if necessary, without injury. If boxes are covered with sawdust, earth or something to exclude the air, it will be better.

After the FROST is ALL OUT the stock can be opened up and treated as above.

New Haven Nurseries, New Haven, Mo.

J. BAGBY & SONS COMPANY

General Information

About Agents

This Price List is our Agent, but we shall be pleased to have you secure orders from your neighbors on Club Lot basis. On Club Orders amounting to \$25.00 or more, on orders at the single, ten and hundred rates, we will allow you 10% additional in stock. It should be very easy for you to get the stock you want absolutely free. We put up each order in a separate package, so that upon receipt of goods you have only to hand out the different lots as ordered. Special prices will be made on larger quantities than indicated in this list.

Distances for Planting

Standard Apples.....	30 feet apart each way
Standard Pears and Strong-growing Cherries.....	20 feet apart each way
Duke and Morello Cherries.....	18 feet apart each way
Standard Plums, Apricots.....	18 to 20 feet apart each way
Peaches, Nectarines.....	18 to 20 feet apart each way
Dwarf Pears.....	10 to 20 feet apart each way
Grapes	rows 10 to 16 feet apart, 7 to 16 feet in rows
Currants and Gooseberries.....	3 to 4 feet apart
Raspberries and Blackberries.....	3 to 4 by 5 to 7 feet apart
Strawberries for field culture.....	1 to 1½ by 3 to 4 feet apart
Strawberries for garden culture.....	1 to 2 feet apart

Number of Trees on an Acre

30 feet apart each way.....	50	18 feet apart each way.....	135
25 feet apart each way.....	70	15 feet apart each way.....	205
20 feet apart each way.....	110		

Rule—Multiply the distance in feet between the rows by the distance the plants are apart in the rows, and the product will be the number of square feet for each plant or hill; which, divided into the number of square feet in an acre (43,560), will give the number of plants or trees to the acre.

Proper planting and cultivation with correct pruning is the best insurance on an orchard.

We Grow Our Own Stock

We mail this list of prices to our friends and customers, and will ask that they favor us with their orders as early as practicable. We have now growing in our nurseries over one million fruit and shade trees. All clean and healthy. ENTOMOLOGIST'S CERTIFICATE WITH EACH SHIPMENT.

Shipments to Pacific Coast and Southern States from our frost-proof storage during winter months via Southern Routes.

WE ARE GROWERS OF WHAT WE SELL. Many nurserymen are simply jobbers in the trade, and cannot sell stock with the same certainty of being true to name and free from disease.

CERTIFICATE OF NURSERY INSPECTION

No. 3.

Issued September 11, 1929.

THIS IS TO CERTIFY that, in accordance with the provisions of the Missouri Plant Act of 1929, the nursery and premises thereof belonging to New Haven Nurseries of New Haven, Mo., have been inspected by a duly authorized inspector and were found to be apparently free of injurious insect pests and plant diseases.

This certificate is not transferable and may be revoked for cause. This certificate expires September 1, 1930.

K. C. SULLIVAN, Plant Commissioner.

We are prepared to fumigate all consignments to states requiring fumigation. No Scale or Yellows has ever been found in our establishment, and we take pride in sending out only clean, healthy stock.
